About Noble Life Sciences, Inc.

Noble Life Sciences is a woman-owned, preclinical CRO operated by scientists with expertise in pharmaceutical development. The company provides GLP and non-GLP preclinical services designed to accelerate development of drugs, vaccines, and medical devices. Noble offers services in pharmacology, disease models, early safety assessments, toxicology, GLP custom polyclonal antibodies, cell line development, and analytical testing. Noble Life Sciences is easily accessible to clients in the Baltimore-Washington area and throughout the mid-Atlantic region. For more information, visit our website at www.NobleLifeSci.com
